

ABSTRACT

DIVISIBLE PILE SLEEVE

5

The invention relates to a pile driving device for driving  
in piles, with an axially-guided impact body movable in a  
hammer housing, an impact hood and a pile sleeve. So that  
the pile driving device can be transported by land without  
10 requiring surveys and preparation, the pile sleeve comprise  
two or more parts, with the pile sleeve being divided into  
radial or circular concentric partitions.
